

Free Discounted Cash Flow Spreadsheet

[% oldschooolvalue.com/blog/investment-tools/free-discounted-cash-flow-dcf-spreadsheet/](https://oldschoolvalue.com/blog/investment-tools/free-discounted-cash-flow-dcf-spreadsheet/)

Discounted Cash Flow Spreadsheet

With any intrinsic value model, there are shortcomings and disadvantages. Even with this version of the discounted cash flow spreadsheet, there are disadvantages to using the DCF model, but it is logical and reasonable.

Before moving on, I also created a free [Graham formula spreadsheet](#) that may interest you.

This free DCF spreadsheet utilizes the [Discounted Cash Flow](#) method, which I believe is a very logical method of valuing a stock and estimating its fair value.

How to Value a Stock with the DCF Spreadsheet

This free discounted cash flows spreadsheet is based off [FWallStreet](#) and is an enhanced version of the original spreadsheet available from fwallstreet.com.

The underlying calculations are the same but many tweaks have been made to the formula and variables.

The full version of the [stock value calculator](#) includes an entire suite of valuation models to help you value stocks quickly and accurately.

Get more tips and investing strategies in your inbox. I'll send you 9 FREE Investing Spreadsheets as a welcome bonus.

How to Download the Free DCF Spreadsheet

To download the free DCF spreadsheet, simply enter your email in the form at the bottom of the page. Once you have entered your email, you will automatically receive, not just the DCF spreadsheet but eight more spreadsheets for your own use. You will also be able to get articles such as this directly to your inbox.

How To Use The Free Spreadsheet

I've tried to make it as user friendly simple to understand.

The spreadsheet requires manual inputs for the required data.

Follow the instructions in the spreadsheet to use it properly.

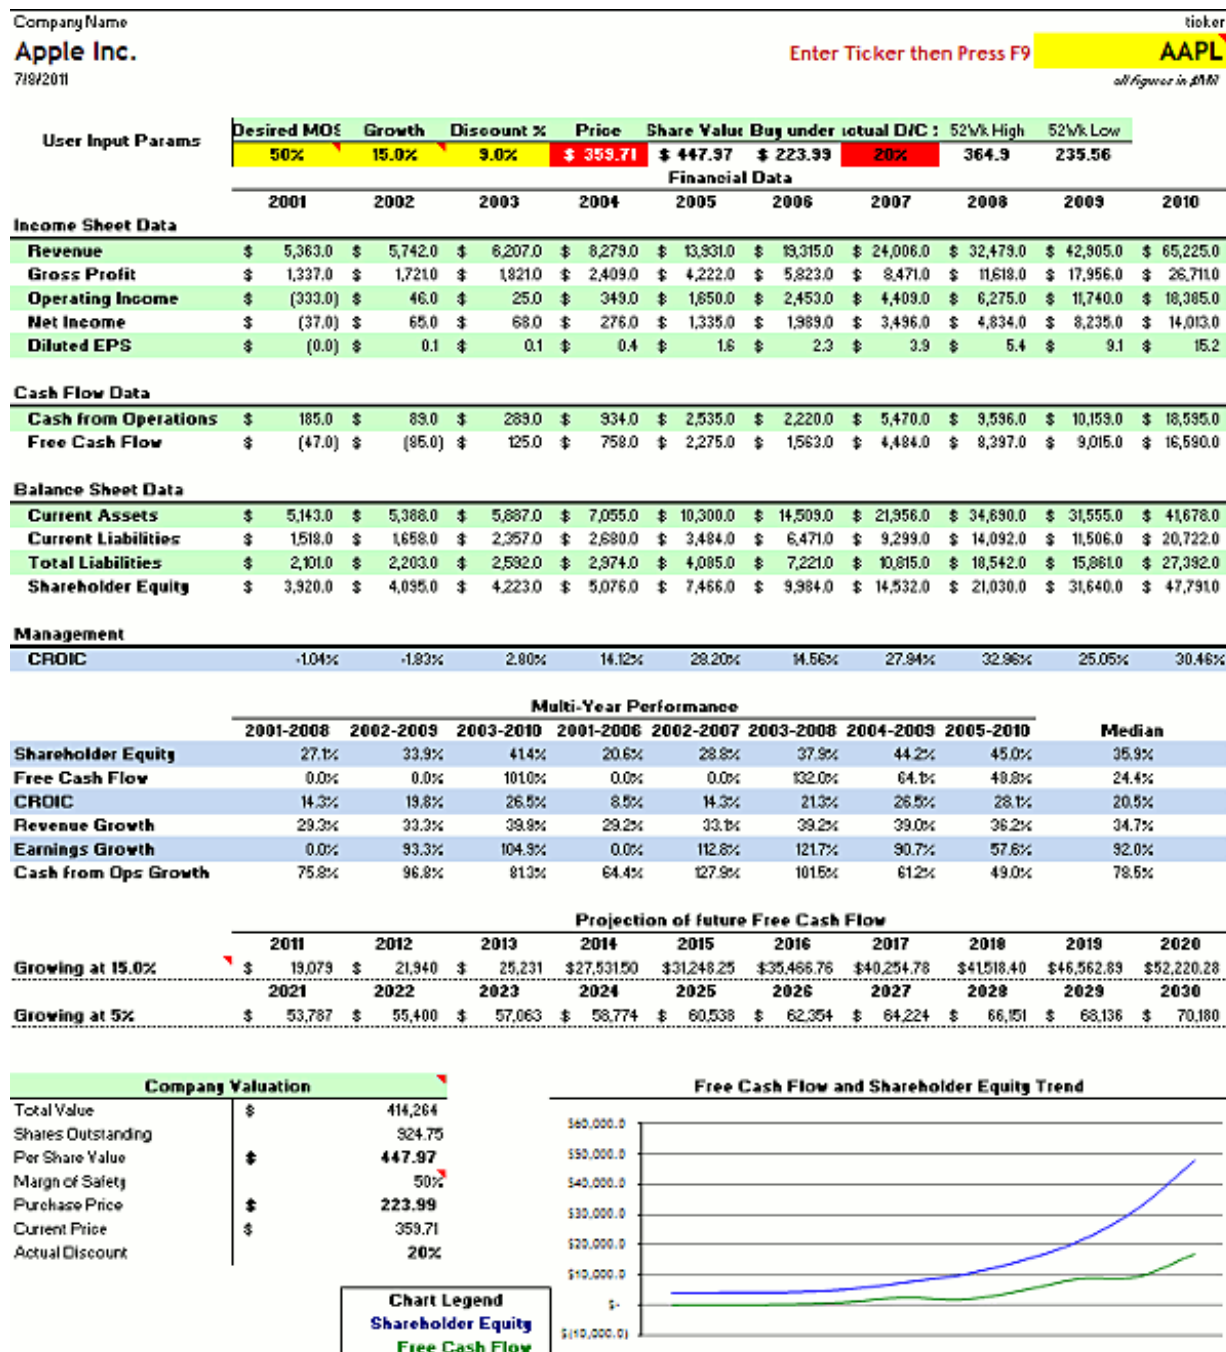

Premium Stock Valuation Spreadsheets

Feel free to check out this free version and then when ready, go to the stock valuation software page and review what you will get with the premium.

The premium version includes several valuation models as well as fundamental analysis data, historical data, charts and competitor comparison features. Just by entering one ticker, you can immediately get all that information on your favorite stock which will save you hours in your analysis.

[Go now and see for yourself why people rave about the spreadsheets.](#)
